

DRIFIRE® FR HI-VIS BROCHURE

THE IMPORTANCE OF FR HI-VIS APPAREL

High-visibility garments play a crucial role in ensuring workers are seen, particularly in low-light or dark environments.

Construction and roadway workers, who are at a significantly higher risk of accidents and potentially fatal injuries in these job sites, depend on this protective gear for safety. To reduce these risks, it is vital that workers wear the appropriate apparel. As per OSHA regulations, all employees working in road and highway construction zones are required to wear high-visibility clothing. Moreover, all hi-vis garments must meet ANSI/ISEA 107 standards. These standards classify garments based on their suitability for specific conditions, with each garment receiving a class rating that determines its level of visibility.

TABLE OF CONTENTS:

Class 2	pg 5 – 7
Class 3	pg 8 – 15
Women's	pg 11
Accessories	pg 16
Rainwear	pg 17 – 19

THE IMPORTANCE OF FR HI-VIS APPAREL

DRIFIRE® offers a range of Class 2, Class 3, and Class E safety options to ensure that workers have the right gear for every situation.

CLASS 2

Class 2 garments are recommended for environments with moderate traffic and some exposure to machinery. These garments are typically identified by one row of reflective trim on the chest and arms/shoulders. They also notably do not require having sleeves, so oftentimes a hi-vis vest will fit into this class rating.

CLASS 3

Class 3 garments are required for high-traffic areas, dark environments, or adverse weather conditions. These garments are distinguished by their mandatory sleeves and reflective trim: two rows of trim placed on the sleeves and/or shoulder or across the chest, with an additional row of trim where there is not two.

CLASS E

Class E garments are considered to be a supplemental class. When worn on their own, they do not meet the requirements of any ANSI class. However, when paired with an ANSI Class 2 garment, it will elevate the ensemble to meet Class 3 standards, enhancing visibility and safety in hazardous environments. Garments such as bib overalls and leg gaiters will often fit into this class.
