## HOW TO MEASURE

### 1 WAIST

Measure around your natural waist, where your waist bends side to side.

**NOTE:** This may not be the smallest point.

### 2 INSEAM

Measure vertically, from the top of your inner thigh to the floor, without wearing shoes.

**NOTE:** Measurements are body measurements to help determine what size garment a person should order. For best results, measure over fitted undergarments. If your measurement falls between sizes, it is recommended that the larger size be purchased.
